ONOWAY'S SPORTS DAY

THURSDAY, AUGUST 1.

All Kinds Sports. Dance in Evg.

The Eyes of the World Are on Alberta.

William E. Hayes, our Social Credit Candidate for the Stony Plain Constituency, was born in Prince Albert, Ontario, on April 14, 1879.

Attended public school in Prince Albert and high school in Port Perry. Moving to Toronto on the death of his father, he took up Pharmacy and graduated from the Ontario College of Pharmacy in 1907, and that same Spring received his Phm. B. degree from Toronto University.

Obedient to the call of the West, he came to Calgary in the Fall of 1908. Since that time he has followed his profession in Alberta.

He has always taken a keen interest in local affairs, and has sat on councils, school boards, boards of trade and agricultural societies. Used to play hockey, baseball and football, but prefers curling or golf now. Is a member of the United Church.

The eyes of the world are on Alberta. On August 22d the people must down the old order of Finance and Taxes, and bring in a Government that stands for Food, Clothing and Shelter for ALL.

Dance of the Young Liberals

The dance held on Friday night, in town here, by the recently organized Young Liberals Club was a very enjoyable affair. The big hall just comfortably held the large number of dancers which attended. Stony Plain and the nearby districts were much in evidence, with a goodly delegation of Young Liberals from the City also present.

Forty Hours Devotion.

On Aug. 2, 3 and 4 the devotion of the Forty Hours will be held at St. Philip's R. C. church, Stony Plain. Rev. Father Woodhouse, of Calder, will preach on Friday Evg. On Saturday Evg. and Sunday the visiting preacher will be Rev. Father O'Sullivan, C. S. S. R. On Sunday Holy Mass will be at 9.00.

Lacombe's Crops Field Day.

The annual Cereal Crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Wed., Aug. 14. This is always one of the largest and most important field days of the summer, and this year there are several new varieties and many marked differences of yield, earliness, general suitability and strength of straw, which distinguish varieties as adapted or not adapted to Alberta conditions of soil and climate. The 1000 plots of the Dominion Crop Testing Plan will make a most interesting subject for comparison and discussion. The Experimental Station will provide coffee, cups, cream, sugar; visitors will please bring their lunches. Program starts 1 p.m.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

"One Wide River To Cross"
"The Unknown Port," Etc.

CHAPTER IX—Continued

"Sometimes they're fierce. Mother insists it's because we're so near the sky! Those storms are the only thing in the world, I believe, that she's afraid of. Her father was killed by lightning before I was born."

Nance shivered.
"No wonder, she's frightened! It's a miracle this tree has escaped being demolished. Does anybody know how old it is?"

Matt shook his head.
"It's a great deal older than any one in these parts surely. Miss Columbine remembers it just like this when she was only a little girl. It must have been struck by lightning many times. I often think—that is—"

Matt was, all of a sudden, self-conscious again; but Nance was merciless.

"Go on," she begged.
"I only mean," he hesitated, "that—"

—that this tree must have seen a lot of interesting things: Pioneers, you know, in their covered wagons; the first settlers struggling to build homes; Indian massacres or war dances; and later, prospectors trudging along with burros. Why, even the old Spanish expedition may have passed this way more than two hundred years ago! I—I often wonder how many of those sights this pine looked down on."

Nance was silent, partly because no boy had ever talked this way to her before, and partly because what Matthew said had stirred her imagination. She was silent so long that the young man moved uneasily.

"I—I suppose, all this sounds sort of foolish to—to a girl like you, but—"

"Why should it?" Nance looked at him so disconcertingly that Matthew lowered his eyes for just a moment. "I guess you thought I was being dumb; but really, I was trying to see things—the things you say this old tree must have seen. And by the way!" (Nance glanced up, smiling, at which Matt became pleasantly aware of a dimple in her left cheek.) "There is something else it saw that you didn't mention. It witnessed the betrothal of Victor and Aurora Tubbs! She said I'd find their initials cut in the bark."

Matthew laughed.
"Mother remembers those initials; but lightning ripped that bark off years ago. Aurora hasn't been up here since she put on flesh, and that's almost as far back as I remember. I hate to hurry you, Miss—or well—(desperately, as the girl grinned at him), "Nancy, but it's getting along toward sundown and it'll soon be cold. Shall we move on?"

Nance said, regretfully: "It's so wonderful here I can hardly tear myself away. Is that the path which leads down by the Tubbs estate? I'll try that trail some day when I'm energetic; and when I get home I'll come up here to get away from every one, and either bawl my head off or snap out of the attack."

"We'll have to see that you don't get home," returned Matt with unexpected gallantry.

A half hour later they drew up at Miss Columbine's side door to find Mark Adam scanning the road impatiently, and Jack seated on a suitcase.

"Have you got a job?" gasped Nance, spying the luggage as she took Mark's upstretched hand and jumped down lightly.

Jack nodded, while the other boy exclaimed: "Where the dickens have you been, Matt? We've telephoned everywhere to find you."

"Blame me," said Nance, while Matthew, flushing again, retorted: "Hain't a feller got a right to take an hour off? What's up?"

"Good and plenty. Luke's broken a leg."

Matthew started, his face grave. "You're not kidding, Mark?"

"Sure I'm not. That new bronc kicked him. Dad and Mother have carried him to the hospital in the Ford."

"Is it a bad break?"

"How'd I know? But" (turning to Nance with his customary smile), "it's a case where an ill wind blew somebody good. Jack's got a job with us till Luke's around again. Pile in, feller. We must be going. We'll take good care of your little brother, Nancy!"

"Hi! Wait a minute!" This was Aurora, bursting through the door with a covered basket. "I made a layer cake this mornin' and it's sure to get stale with Jack away. I cut a hunk for Nancy, and the rest's in the basket with a couple of loaves of good fresh bread. You better take it, Mark Adam. Your mother won't get back in time for supper; and if she does she'll be too upset to get a proper meal even if she knew how, which goodness knows she doesn't and never did. You hold that basket right side up, boys, and—"

She was still expounding voluble instructions when the engine started. Mark blew her a kiss of thanks as they drove away.

CHAPTER X.

It was ten days before Nancy saw her brother again, a rather lonesome ten days, on the last of which the Colorado sunshine gave way to what Aurora called "a baby blizzard," and Cousin Columbine went to bed with a cold. The wind was furious, and Nance retired to her tower and surreptitiously donned two pairs of silk stockings since no chance had arisen to buy sport hose.

Even a stouter heart than hers would have found the day more or less gloomy. The halls in the old house were frigid and wind blew through every crack. At Aurora's invitation she took pen and paper into the kitchen, meaning to write letters; but under the good woman's steady fire of conversation it was impossible to concentrate, and at last she sought the sitting room in search of reading matter.

To one of Nancy's generation the contents of the walnut bookcase were not enticing. There was a handsome edition of Scott, but one glance at long pages of description was enough. There were two old-fashioned novels by some one named Mulock; a "Pilgrim's Progress"; a book called "What To Do Before The Doctor Comes," and a set of Dickens which looked a bit less hopeless than the others. Nancy could remember her father reading parts of "David Copperfield" aloud when she was little; but these volumes were big and heavy. They looked endless, too. In

desperation she went back to the kitchen and Aurora's monologues. "Is there a public library in this place?" she questioned.

Aurora popped a pie into the oven and responded: "What good would it do? So far as I know they ain't any one in Pine Ridge but Victor Tubbs that's got time to read, and it takes him all day to read the paper. And no wonder! He don't let even the smallest advertisement get by him. He's upset Juanita considerably by mentioning a place at Colorado Springs where you can get a permanent wave for two dollars and fifty cents. She's asked Eve Adam to take her down some day when they go to see Luke at the hospital, and I don't hardly expect to recognise my own daughter when she gets back. No, we don't have any use for a library at Pine Ridge."

Recalling the "Confession" magazines she had seen Juanita indulge in at the drug store, Nance suggested: "Perhaps if you had a real good library your young folks wouldn't waste their money on such trashy reading matter."

"Maybe," admitted Aurora, "but I doubt it. If you mean those low magazines, I'll admit I find 'em real refreshin'."

"But I thought you had no time to read?"

"No more I do," replied Aurora, undaunted at this thrust; "but sometimes I glance at 'em to rest me. In one of 'em stories a boy and girl got engaged under a pine tree like Tubbs and me. Here's Mark Adam with the milk. Shut that door quick, Mark. No matter about bringin' in some snow along with your feet. I ain't scrubbed my floor yet, and I ain't goin' to till things dry up. Shut that door! Do you want to freeze us? How's Jack gettin' along? How's Luke? And is your mother bearin' up under this affliction?"

Mark deposited two milk bottles on the table as he said: "One question at a time, please. This is some storm, isn't it? Are you occupying the kitchen in order to keep warm, Nancy, or to profit by the conversation of our estimable Mrs. Tubbs?"

"Don't you be impertinent, Mark Adam," snapped Aurora. "She's here to get warm and no wonder with nothin' but a layer of silk stockings to protect her legs. You haven't answered—"

"Give me time," Mark interrupted, warming his cold fingers at the stove. "Jack couldn't do better. We'll have an expert milk long before Luke's ready for the job again. He sent his love to every one, and so would Matt if he wasn't so bashful. Say!" (turning to Nancy), "how'd you ever manage to rope my brother into taking you up to the old place?"

"Rope him!" exclaimed Nancy. "I call that an insult."

"Well to tell the truth," broke in Aurora, "I almost lost my breath when you rode into the yard the other day. It ain't Matthew Adam's habit, takin' girls to ride; and you're so stylish, Nancy. I donno how he got up courage to suggest you goin' in that old truck."

"That's the advantage of a college education," observed Mark, with a wink for Nancy. The emergency arose, Aurora, and despite his fear of the female of the species, my brother was able, because of his superior learning, to conquer—"

"Goodness gracious!" burst out Aurora, "I don't want such rubbish. Take off that coat, Mark Adam, and let me dry it. What are you giggling at?"

"That's what I told Aurora; but she said—"

"You're to stay to dinner," announced Aurora, bursting in upon them. "Miss Columbine says she wouldn't send a dog into this storm without he had a good full stomach. Don't you make any objections, Mark Adam. Pine Ridge can wait for their milk an hour longer. Miss Columbine says so herself. She says

Christie's Biscuits

"There's a Christie Biscuit for every taste"

about, Nancy? You ought to encourage a young man to talk more sensible. How's Luke? And you didn't say if your mother was bearin' up. I always thought Luke was her favorite, or maybe it's because he ain't so huffy as the rest of us."

Mark grinned as he slipped off the wet jacket.

"Luke's doing first rate. He'll be home next week and hobble round on crutches. Mother's all right; and if she likes Luke best, Aurora, it's only because he's not so good looking as the rest of us. It's what they call the—er—ugly duckling complex, I suppose."

Aurora morted.

"I donno what anybody's complexion has to do with it; but there's some folks in Pine Ridge that think Luke Adam's the handsomest of the lot, not excepting Matthew. And he's an awful sweet boy too. There's Miss Columbine poundin' Nance, (as the girl sprang up), "I'll go find out what she wants while you keep Mark Adam, and get yourself hot through."

"Tell me," said Nancy, "is Jack really doing the work all right?"

"Sure he is!" Mark was straddling a kitchen chair, his elbows resting on its back while he looked at the girl intently. "Mother's adopted him already—says he's just like one of her own boys, and that's high praise from Mother! She wants you to come out and spend a Sunday when it's good weather. What in time do you do with yourself a day like this?"

"Listen to Aurora," replied Nance softly. "I wanted to read, but Cousin Columbine's books look stuffy; and Aurora tells me there's no public library. She says no one in Pine Ridge has time to read. What do they do—evenings, I mean?"

"According to the old story they 'set and think, and sometimes they just set!" laughed Mark. "I'll bring you some books from home to-morrow. Nancy, if we had a library here, even a small one, I bet the population would profit by it. All most of these people read is trashy magazines."

"That's what I told Aurora; but she said—"

"You're to stay to dinner," announced Aurora, bursting in upon them. "Miss Columbine says she wouldn't send a dog into this storm without he had a good full stomach. Don't you make any objections, Mark Adam. Pine Ridge can wait for their milk an hour longer. Miss Columbine says so herself. She says

THE NEW BISCUIT SENSATION THAT HAS TAKEN CANADA BY STORM

Nutty flavored, slightly salted, little Soda Water that makes a real "event" out of all entertaining.

they're lucky to get their milk at all, a day like this, and no one without the Adam's conscience would have started out. Mercy to goodness! Are my pies burnt?"

But the pies were safe, browned to perfection. Though Aurora—declared her fright had given her a palpitation.

"And I can't get a proper meal with young folks clutterin' up my kitchen," she declared. "You put some coal in the stittin' room stove, Mark Adam, and then you and Nancy clear out till I call. Dinner'll be ready in no time; and Miss Columbine'll be offended if you don't stay. She says maybe you'll keep Nancy from bein' homesick."

"In that case," returned Mark with an engaging smile, "I can't refuse."

(To Be Continued)

Novel Club for London

King Is President And Only Famous Hunters May Join

One of the most exclusive clubs in the world has opened up permanent London quarters, according to William Gourlay, manager of the American Express Travel Service. The quarters will house the membership of the Shikhar Club, composed of famous hunters, its membership only acceptable to men who can boast half-blooded escapes from the jaws and claws of man-killing beasts of the jungle. The president of the club is the King, the patron is the Prince of Wales, and the Earl of Londsdale. The decorations of the place will be enlarged photographs taken by individual members.

The total shipments of certified potato seed from Canada in 1934 amounted to 1,328,745 bushels, 728,582 bushels being shipped from January to May inclusive, and 600,163 bushels from the fall to December 31.

STOP THAT ITCH

In One Minute

D. D. D. Prescription Speeds Relief

It is really surprising to see how Dr. D. D. D. Prescription quickly stops itching, stinging, burning, soreness, redness, and all other skin ailments. Forty years' world-wide success. It goes the channels, the skin, the blood, and the system, and the inflamed tissue, dries up almost immediately. No fuss—no mess. Clear, granules and stinging—dries up almost immediately. Try D. D. D. Prescription today. Stop the itch now! It's a sure cure. It's a little bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

Prepared by Dr. J. C. Pinkham, Lowell, Mass.

Save "LEFT-OVERS" with Appleford's Presto Pack

MORE CONVENIENT TO USE

Just hang a package in your kitchen. You'll be delighted with its convenience. For, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-overs" being wrapped.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

JOHN VAN GUILDER

Growth Of Root System Of Wheat Will Determine The Later Yield Of Grain

The scientist wishing to speed up the improvement of crop plants, will in future, judge them underground. What is found in the root system is reflected later in the upper part of the plant, experiments on the field husbandry plots of the University of Saskatchewan, seem to indicate.

With a little more definite data, Dr. J. E. Harrington, who is in charge of the department, expects the appearance of the root system within a month after seedling will give a clue to the yielding ability of parent plants for cross-breeding. This will save years of testing. For example, different wheats planted under similar conditions, were examined 22 days after the plant had emerged from the ground. Prelude wheat had penetrated 15 inches, Reward 22 inches, Marquis 28 inches and Alliance 31 inches. The yield of these four wheats at Saskatoon follows the same order.

Last year the total root system of these wheats was measured. The roots of Prelude totalled in length 6,700 inches, of Reward 7,300, of Marquis 8,300 and of Alliance 8,600. The yield of the four varieties followed fairly closely in the same proportion.

The advantage of the plant breeder who could definitely associate the growth of root system with the yield of grain, is obvious. If he had a hundred heads of wheat from which to choose in his plant breeding operations, he could plant a row of each and by comparing the roots of a few plants of each row, pick out the thickest breeding material. At present the choice is more or less a guess.

T. Pavlychenko, who is carrying out these experiments, also finds a possibility of interesting discoveries from the tests that are being made of the ability of different plants to compete with others for the use of the soil.

Russian thistle is an example of a plant that makes wonderful growth as long as no other plant wants the soil. A single seed of Russian thistle given all the space it required, last year produced a root system over 17 feet in diameter. The top growth contained 6.2 grams of dry matter. Compare with this a Russian thistle growing in competition with a grain crop. The roots were only 9-10 inches across and the dry weight of the top only half a gram.

Of the plants tested, the one that put up the most successful struggle for a place in the soil was the wild oat. Where the Russian thistle had only 81 feet length of total root system when grown under conditions of competition, the wild oat had 841 feet, Hannchen barley 770 feet, and Marquis wheat 162 feet. The wild oat produced 5.2 grams of dry matter, the Hannchen barley 4.7 grams, and the wheat 0.6 grams, above ground.

There is in each plant a close relation between the size of the root system and the production of the plant above ground. When the farmer has a crop that will fight for the soil as efficiently as the wild oat, weeds will lose out in the struggle for existence.

Hottest Star

Far-Off Heavenly Body Has Temperature Of 180,000 Degrees

An unnamed, far off star, whose surface temperature is 180,000 degrees Fahrenheit, the highest heat ever measured anywhere, was described to the conference on spectroscopy at the Massachusetts Institute of Technology.

The sun's surface is barely 10,000 degrees Fahrenheit. The hottest temperatures previously reported, all on stars, were 35,000 to 40,000 degrees Fahrenheit.

Scientists Claim Discovery
Discovery that sugar can take on a mysterious form of "ice" from ultra-violet light and thereby prevent germs from growing created a sensation among biologists at the conference of spectroscopy at Massachusetts Institute of Technology.

Revival Of Town Orchestra

Movement Has Started In England And Likely To Grow There

Out of this age of jazz there has sprung a new movement expressive of a desire to enjoy a deeper musical experience than that afforded by merely listening to the radio. The movement takes the form in Britain of a revival of the voluntary town or country orchestra. This type of entertainment virtually disappeared under the wave of canned music. It once held pride of place in local concert halls. Based as it was upon a sheer love of music, it deserved to endure, but the radio was overwhelming.

Now it rises again, as the Surrey String Players, for instance, eloquently testify, none the worse for the experience. Here is an orchestra in which the players play to take part, an orchestra entirely of strings—no wind or percussion instruments—and in which a buoyancy and enthusiasm born of a joy in expression and a delight in sharing shine through every note that is played. It is no sordid ambition which leads a shopkeeper, at the end of a long day's work, to shoulder a base fiddle and march off to do his part at a concert; it is no idle whim which prompts a second violin player to grind for hours in practice so that the orchestra of which he is but a humble member may approach perfection in public.

When an orchestra of this kind can survive and flourish, there is hope for the future of music. For music is not confined to the regimented few whose dexterity is the marvel of a widespread radio audience. It speaks a language whose universality has no competer, a language which the child as well as the man or woman can understand. Is there any reason, then, why individuals should cease to participate in its development? Revival of the voluntary orchestra is the answer—Christian Science Monitor.

Some Old Remedies

Extreme Cures Were In Use During 18th Century

If you had lived in an English village during the 18th century and suffered from gout, your physician might have advised you to swallow two ounces of soap a day for three months—besides oyster-shell or egg shell powder. For smut, you would have been given a black powder made from 30 to 40 toads burnt in a new pot. A daily half-pint of liquor made by boiling mistletoe berries and leaves in ale was an admirable specific for fits—at least according to the village doctor. Miss Rosamond Bayne-Powell, who quotes these remedies in her new book, "English Country Life in the Eighteenth Century," explains that in those days a man could set up as an apothecary with little or no experience, and without any kind of examination.

Looking For Assistance

A clergyman who was passing a freight station was shocked to hear a string of abuses coming from the other side of a cattle-car.

On investigating he saw two workers endeavoring to force a mule inside the car. The mule, however, was determined not to enter without a struggle.

"Ah, my good fellows," said the clergyman, "I see you are having a hard task. Can I be of any assistance?"

"Yes," said one of the men, wiping his perspiring brow. "Being a preacher, maybe you can tell us how Noah managed to get two of these consarned mules into the Ark?"

Royalty Accepts Song

Written by Maurice Zbriger, well-known Montreal musician, the song, "Marina," has been accepted by their majesties the King and Queen. Official notification of the acceptance has been received. The song was played at the jubilee court ball at Buckingham palace June 13.

Black Powder And Dynamite

Two Powerful Explosives Are Quite Different In Action

There is little understanding of the difference between the action of black powder and dynamite, even by those who use such explosives. Blasting or "black" powder is the oldest explosive for commercial use. It is prepared in grains closely resembling fine lumps of high-grade coal. This is a deflagrating explosive; that is, it is fired by igniting the gases are generated progressively as the burning spreads through the charge. It is the slowest-acting of all explosives. It has a heaving, not a shattering action and hence tends to break down the blasted material in large fragments. Dynamite is a detonating explosive. That is it is fired by shock from an intermediate agent, known as a detonator. What actually happens when dynamite explodes? To answer this question it is necessary to explain briefly what dynamite is. Dynamite is a mixture of nitro-glycerine with wood meal and nitrate of soda or nitrate of ammonia, or both. Nitro-glycerine is composed of several different elements, namely, carbon, hydrogen, nitrogen and oxygen, the molecules of which are grouped in such a way as to form a heavy, oily, yellow liquid. These same molecules are, however, capable of arrangement in other groups to form several different substances instead of one and the bonds that hold them together in the particular arrangement which makes nitro-glycerine are very weak. Consequently, when the detonator, which is embedded in the dynamite is set off a sharp shock and a very high temperature are imparted to the nitro-glycerine in the dynamite, thus resulting in the breaking down of the bonds between the molecules which compose nitro-glycerine.

In the Pleistocene period, California was a tropical jungle roamed by the largest land mammals.

Canada Has A Set-Up For Field Research That Is Probably Unexcelled

Experiments With Grass Silage

Old Methods Out If New Tests Are Secured

Dairy farmers will no longer have to "make hay while the sun shines," if future experiments with grass silage meet with the success of the preliminary work completed recently by the New Jersey Agricultural Experiment Station at Rutgers University. Prof. Carl R. Bender, associate in dairy husbandry, treated grass with 40 pounds of molasses and 60 pounds of water to every ton of green matter before it was put into the silo for preservation, in his experiments at the Sussex County branch of the experiment station. The grass used included third-cutting alfalfa, mixed with some timothy and fescue. It is believed that any kind of grass could be used successfully. When the grass was cut and put into the silo before it had an opportunity to cure excellent silage of good feeding value resulted.

Prof. Bender explained that if grass silage does replace hay it will mean that the haymaking process of dairy farms can be eliminated. It may mean, he said, that farmers will not have to depend upon the sun to cure hay but that they will be able to cut grass when its protein content is highest. Farmers can then give primary consideration to feed value, total for a grass and the weed crop, rather than to the weather, which constitutes an important problem in the East, particularly with alfalfa.

The modern girl adores spinning wheels, but she wants four of them and a spare.

The SNAPSHOT GUILD

'Make Your Pictures Say Something'

Always have your subjects doing something

Hundreds of thousands of juvenile story books are sold every year and the ones we loved most our younger years were those translated into pictures, because they had a human appeal. All through our lives we retain our interest in picture stories. It is this appeal that takes us to the movies and causes us to look through the pages of daily newspapers and magazines for pictures that tell stories of human activities.

But when it comes to snapshots, so many seem to forget how much they enjoy looking at story-telling pictures. They pick up their cameras and shoot the trunk of a tree or get any pictures at all, as it was in the old days of "You Press the Button and We Do the Rest."

There is a better way to take pictures. If you want to enjoy some good laughs take a look at some of the pictures in the old family album or some of the snapshots you took several years ago. There you will probably find some perfect examples of record pictures—pictures of Uncle Charlie or Aunt Minnie in a stiff pose against the trunk of a tree or with an unattractive garage door as a background. Don't take pictures of your friends just standing looking at the camera. Have them lighting a cigarette, reading, or doing something to attract the camera's eye. Human interest touch that should be in every film you expose.

You go out on a picnic with your friends. What do you do? The chances are that you line up the

gang, you snap the camera and again have just another picture when it would be just as easy to have the crowd enjoying the lunch and perhaps one member busily engaged in the act of "exterminating" a luscious ear of corn or doing a "boarding house reach" for the potato salad.

If you were making movies, would you take foot after foot of film with your actors doing nothing? Of course not, and it isn't a bad idea to think of your "still" camera as a movie camera filming a drama. Get action and meaning. This means that you should think before you shoot.

The two pictures above really "say something." Jack's picture with his bicycle tells of "chain trouble" and a delay in meeting the gang at the vacant lot for a game of baseball while Billie is probably telling his young girl friend about his great adventures as a sailor; of pirate's gold and Pieces of Eight.

In case you have never given much thought to this before, just take a look through a newspaper or magazine and notice which places you more—pictures of people merely looking at the camera or pictures of people doing something humanly interesting and significant. Chances are that the story-telling pictures will be your choice, and you'll make up your mind that hereafter that the kind you'll aim to take. Good luck!

JOHN VAN GUILDER

Dr. J. M. Swaine, Director of Research, Dominion Department of Agriculture, Ottawa, in an address at the 15th annual convention of the Canadian Society of Technical Agriculturists assembled at Edmonton, Alberta, gave a brief outline of Canada's research resources. Canada, he said, had great resources in her institutions in able and well-trained researchers, but that there was great need for more of them. The Dominion Department of Agriculture, with headquarters at Ottawa, had a staff of experts, together with 60 laboratories, large and small, which were devoted chiefly to agricultural research. They were attached to different branches of the department and were distributed throughout all the provinces. There were 34 experimental farms in the various provinces in which over 100 projects were conducted, and there were more than 200 illustration stations available for testing and demonstrating the results of research.

Through this system of field laboratories and farms, with officers directing the work, the major field problems throughout the Dominion, the Department of Agriculture had a set-up for field research which was probably unexcelled, and it had good facilities also for certain types of laboratory research. In addition, there were several hundred officers engaged in the administration of Dominion Agricultural Acts and in extension and service work along many lines, so that excellent liaison was provided between research on the one hand and the industry on the other.

The National Research Council, said Dr. Swaine, had well equipped laboratories in a splendid, modern building, situated at Ottawa, with a small but highly-trained staff devoted in the main to fundamental agricultural research. In addition to the Division of Biology and Agriculture, the Division of Physics and Engineering and the Division of Chemistry conducted researches on special agricultural problems involving those sciences.

The agricultural colleges in the different provinces had many members of the staff and graduate students engaged in research, and they were making very important contributions in this field. They had, in addition, the most important function of discovering and training the future research workers. The Provincial Departments of Agriculture were conducting many research projects, in great part in connection with the agricultural colleges. Like the Dominion Department of Agriculture, they had highly efficient extension services which formed an invaluable liaison between the research and the industry. There were there the university laboratories, outside the agricultural colleges, with individual research workers engaged on problems affecting agriculture. Further, there was the Canadian Society of Technical Agriculturists which was a powerful factor in the advancement and co-ordination of agricultural research through its committees, the many contacts it had facilitated, and its publications and moral support. Various professional societies had in the same way contributed in their respective fields.

Owens Vast Toy Army

Man Has Spent Lifetime In Building Up Collection

The world's largest collection of toy soldiers, representing a modern mechanized army drawn up on a seventeen-mile battle front, has been on exhibition at the Royal United Services Museum, Whitehall, England. One man has spent a lifetime in building up the collection of 20,000 pieces from which this exhibit is selected. He is Leicester Hewitt, of Hunstanton. A third of the pieces shown he has made himself. The rest were bought. "Sometimes I have to buy soldiers from abroad," Hewitt said, "then I give them British heads and uniforms." The unique exhibit attracted large crowds.

"The Unknown Port," Etc.

CHAPTER IX.—Continued

"Sometimes they're fierce. Mother insists it's because we're so near the sky! Those storms are the only thing in the world, I believe, that she's afraid of. Her father was killed by lightning before I was born."

"No wonder she's frightened! It's a miracle this tree has escaped being demolished. Does anybody know how old it is?"

Matt shook his head.
"It's a great deal older than any one in these parts surely. Miss Columbine remembers it just like this when she was only a little girl. It must have been struck by lightning many times. I often think—that is—"

Matt was, all of a sudden, self-conscious again; but Nance was merciless.

"Go on," she begged.
"I only mean," he hesitated, "that—that this tree must have seen a lot of interesting things: Pioneers, you know, in their covered wagons; the first settlers struggling to build homes; Indian massacres or war dances; and later, prospectors trudging along with burros. Why, even the old Spanish expeditions may have passed this way more than two hundred years ago. I—I often wonder how many of those sights this pine looked down on."

Nancy was silent, partly because no boy had ever talked this way to her before, and partly because what Matthew said had stirred her imagination. She was silent so long that the young man moved uneasily.

"I—I suppose, all this sounds sort of foolish to—to a girl like you, but—"

"Why should it?" Nance looked at him so disconcertingly that Matthew lowered his eyes for just a moment. "I guess you thought I was being dumb; but really, I was trying to see things—the things you say this old tree must have seen. And by the way!" (Nance glanced up, smiling, at which Matt became pleasantly aware of a dimple in her left cheek.) "There is something else it saw that you didn't mention. It witnessed the betrothal of Victor and Aurora Tubbs! She said I'd find their initials cut in the bark."

Matthew laughed.
"Mother remembers those initials; but lightning ripped that bark off years ago. Aurora hasn't been here since she put on flesh, and that's almost as far back as I remember. I hate to hurry you, Miss—"

"—er—well," (desperately, as the girl glanced at him), "Nancy, but it's getting along toward sundown and I'll soon be cold. Shall we move on?"
Nance said, regretfully: "It's so wonderful here I can hardly tear myself away."

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.
Sold at all good drug stores.

Lydia E. Pinkham's
Vegetable Compound

self away. Is that the path which leads down by the Tubbs estate? I'll try that trail some day when I'm energetic; and when I get home I'll come up here to get away from every one, and either hawl my head off or snap out of the attack."

"We'll have to see that you don't get homesick," returned Matt with unexpected gallantry.

A half hour later they drew up at Miss Columbine's side door to find Mark Adam scanning the road impatiently, and Jack seated on a suitcase.

"Have you got a job?" gasped Nance, spying the luggage as she flew. Mark's unperturbed head and jumped down lightly.

Jack nodded, while the other boy exclaimed: "Where the dickens have you been, Matt? We've telephoned everywhere to find you."

"Blame me," said Nance, while Matthew, flushing again, retorted: "Hain't a feller got a right to take an hour off? What's up?"

"Good and plenty. Luke's broken a leg."

Matthew started, his face grave.

"You're not kidding, Mark?"

"Sure I'm not. That new bronc kicked him. Dad and Mother have carried him to the hospital in the Ford."

"Is it a bad break?"

"How'd I know? But!" (turning to Nance with his customary smile), "it's a case where an ill wind blows somebody good. Jack's got a job with us till Luke's around again. Pile in, feller. We must be going. We'll take good care of your little brother, Nancy!"

"Hi! Wait a minute!" This was Aurora, bursting through the door with a covered basket. "I made a layer cake this mornin' and it's sure to get stale with Jack away. I cut a hunk for Nancy, and the rest's in the basket with a couple o' loaves of good fresh bread. You better take it, Mark Adam. Your mother won't get back in time for supper; and if she does she'll be too upset to get a proper meal even if she knew how, which goodness knows she doesn't and never did. You hold that basket right side up, boys, and..."

She was still expounding voluble instructions when the engine started. Mark blew her a kiss of thanks as they drove away.

CHAPTER X.

It was ten days before Nancy saw her brother again, a rather lonesome ten days, on the last of which the Colorado sunshine gave way to what Aurora called "a baby blizzard," and Cousin Columbine went to bed with a cold. The wind was furious, and Nance retired to her tower and surreptitiously donned two pairs of silk stockings since no chance had arisen to buy sport hose.

Even a stouter heart than hers would have found the day more or less gloomy. The halls in the old house were frigid; and wind blew through every crack. At Aurora's invitation she took pen and paper into the kitchen, meaning to write letters; but under the good woman's steady fire of conversation it was impossible to concentrate, and at last she sought the sitting room in search of reading matter.

To one of Nancy's generation the contents of the walnut bookcase were not enticing. There was a handsome edition of Scott, but one glance at long pages of description was enough. There were two old-fashioned novels by some one named Mulock; a "Pilgrim's Progress"; a book called "What To Do Before The Doctor Comes"; and a set of Dickens which looked a bit less hopeless than the others. Nancy could remember her father reading parts of "David Copperfield" aloud when she was little; but these volumes were big and heavy. They looked endless, too. In

desperation she went back to the kitchen and Aurora's monologues. "Is there a public library in this place?" she questioned.

Aurora popped a pie into the oven and responded: "What good would it do? So far as I know they ain't any one in Pine Ridge but Victor Tubbs that's got time to read, and it takes him all day to read the paper. And no wonder! He don't let even the smallest advertisement get by him. He's upset Juanita considerably by mentionin' a place at Colorado Springs where you can get a permanent wave for two dollars and fifty cents. She's asked Eve Adam to take her down some day when they go to see Luke at the hospital, and I don't hardly expect to recognize my own daughter when she gets back. No, we don't have any use for a library at Pine Ridge."

Recalling the "confession" magazines she had seen Juanita indulging in at the drug store, Nance suggested: "Perhaps if you had a real good library your young folks wouldn't waste their money on such trashy reading matter."

"Maybe," admitted Aurora, "but I doubt it. And if you mean those boys' magazines, I'll admit I find 'em real refreshin'."

"But I thought you had no time to read?"

"No more I do," replied Aurora, undaunted at this shy thrust, "but sometimes I glance at 'em to rest me. In one o' them stories a boy and girl get engaged under a pine tree like Tubbs and me. Here's Mark Adam with the milk. Shut that door quick. Matt's been talkin' about bringin' in some snow along with your feet. I ain't scrubbed my floor yet, and I ain't got to till things dry up. Shut that door! Do you want to freeze us? How's Jack gettin' along? How's Luke? And is your mother hearin' up under this affliction?"

Mark deposited two milk bottles on the table as he said: "One question at a time, please. This is some storm, isn't it? Are you occupying the kitchen in order to keep warm, Nancy, to protect by the conversation of our estimable Mrs. Tubbs?"

"Don't you be impertinent, Mark Adam," snapped Aurora. "She's here to get warm, and no wonder with nothin' but a layer of silk stockin' to protect her legs. You haven't answered."

"Give me time!" Mark interrupted, warming his cold fingers at the stove. "Jack couldn't do better. We'll have an expert milker long before Luke's ready for the job again. He sent his love to every one, and so would Matt if he wasn't so hateful. Say!" (turning to Nancy), "how'd you ever manage to rope my old brother into taking you up to the old pine?"

"Rope him?" exclaimed Nancy. "I call that an insult!"
"Well to tell the truth," broke in Aurora, "I almost lost my breath when you rode into the yard the other day. It ain't Matthew Adam's habit, takin' girls to ride; and you're so stylish, Nancy, I donno how he got up courage to suggest you goin' in that old truck."

"That's the advantage of a college education," observed Mark, with a wink for Nancy. "The emergency arose, Aurora, and despite his fear of the female of the species, my brother was able, because of his superior learning, to conquer—"

"Goodness gracious!" burst out Aurora, "I never heard such rubbish. Take off that coat, Mark Adam, and let me dry it. What are you giggling at?"

Biscuits
"There's a Christie Biscuit for every taste"

about, Nancy? You ought to encourage a young man to talk more sensible. How's Luke? And you didn't say if your mother was hearin' up. I always thought Luke was her favorite, or maybe it's because he ain't so husky as the rest of you."

Mark grinned as he slipped off the wet jacket.

"Luke's doing first rate. He'll be home next week and hobble round on crutches. Mother's all right; and if she likes Luke best, Aurora, it's only because he's not so good looking as the rest of us. It's what they call the—er—ugly duckling complex, I suppose."

Aurora morted.

"I donno what anybody's complexion has to do with it; but there's some folks in Pine Ridge that think Luke Adam's the handsomest of the lot, not excepting Matthew. And he's an awful sweet boy, too. There's Miss Columbine poundin' No. Nancy," (as the girl sprang up), "I'll go find out what she wants while you keep Mark company. Set close to the range, Mark Adam, and get yourself lost through."

"Tell me," said Nancy, "is Jack really doing the work all right?"

"Sure he is!" Mark was straddling a kitchen chair, his elbows resting on its back while he looked at the girl intently. "Mother's adopted him already—says he's just like one of her own boys, and that's high praise—from Mother! She wants you to come out and spend a Sunday when it's good weather. What in time do you do with yourself a day like this?"

"Listen to Aurora," replied Nance softly. "I wanted to read, but Cousin Columbine's books look stuffy; and Aurora tells me there's no public library. She says no one in Pine Ridge has time to read. What do they do—evenings, I mean?"

"According to the old story they 'set and think, and sometimes they just set!" laughed Mark. "I'll bring you some books from home to-morrow, Nancy. If we had a library here, even a small one, I bet the population would profit by it. All most of these people read is trashy magazines."

"That's what I told Aurora; but she said—"

"You're to stay to dinner," announced Aurora, bursting in upon them. "Miss Columbine says she wouldn't send a dog into this storm without he had a good full stomach. Don't you make any objections, Mark Adam. Folks can wait for their milk an hour longer. Miss Columbine says so herself. She says

they're lucky to get their milk at all, a day like this, and no one without the Adam's consistency would have started out. Mercy to goodness! Are my pies burnin'?"

But the pies were safe, browned to perfection though Aurora declared her fright had given her a palpitation.

"And I can't get a proper meal with young folks clutterin' up my kitchen," she declared. "You put some coal in the stittin' room-stove, Mark Adam, and then you and Nancy clear out till I call! Dinner'll be ready in no time; and Miss Columbine'll be offended if you don't stay. She says maybe you'll keep Nancy from bein' homesick."

"In that case," returned Mark with an engaging smile, "I can't refuse." (To Be Continued)

Novel Club For London

King is President and Only Famous Hunters May Join

One of the most exclusive clubs in the world has opened up permanent London quarters, according to William Goursay, manager of the American Express Travel Service. The quarters will house the membership of the Shikar Club, composed of famous hunters, its membership only acceptable to men who can boast half-breath escapes from the jaws and claws of man-killing beasts of the jungle. The president of the club is the King, the patron is the Prince of Wales and the Earl of Londsdale is the chairman. The decorations of the place will be enlarged photographs taken by individual members.

The total shipments of certified potato seed from Canada in 1934 amounted to 1,328,745 bushels, 728,582 bushels being shipped from January to May inclusive, and 600,163 bushels from the fall to December 31.

STOP THAT ITCH In One Minute

D. D. D. Prescription Speeds Relief

It is really surprising to see how Dr. D. D. D. Prescription quickly stops itching, burning, stinging, and other troubles of eczema, psoriasis, scabies, or other insect bites, rashes and other skin afflictions. Forty years' world-wide experience has proven its power to soothe, soothe and heal the inflamed tissues. No fuss—no mess. Clear, graceful and stainless—dries up almost immediately. Try Dr. D. D. D. Prescription today. Stop those itches itching instantly! A little trial bottle, at any drug store, is guaranteed to give you relief. Dr. D. D. D. is made by the owners of ITALIAN BALM.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

WORLD HAPPENINGS
BRIEFLY TOLD

Friends of the late Col. T. E. Lawrence — Lawrence of Arabia — announced the death of St. Paul's Cathedral had offered space there for a memorial to him.

Dr. E. Cora Hind, of the Winnipeg Free Press, was the luncheon guest of the directors of the Liverpool Corn Trade Association on July 3 at Liverpool.

Notices inviting all negro men in Montreal aged 21 or over, in good physical condition, to register for service with the forces of Emperor Haile Selassie, of Ethiopia, have been posted throughout Montreal.

A loan of \$500,000 has just been authorized by the Dominion government to the province of Manitoba for re-union to the city of Winnipeg to meet expenses of the city in connection with 1934 relief projects.

Sweden recently celebrated the 500th anniversary of the Swedish Riksdag or parliament, the first recorded meeting being in 1435. Only the British and Icelandic parliaments are older than Sweden's.

First import of its kind through Montreal, anthracite coal from French Indo-China—a load of 8,000 tons carried in the Norwegian motorship Bonneville—arrived recently to be sold on the Canadian market.

Rear-Admiral Gerald Clive Dickson, a grandson of the famous novelist, was appointed commander-in-chief of the reserve fleet of the royal navy, in succession to Vice-Admiral Astley-Read, killed in a motorcar accident.

A crate of used books arrived at the entrance to the London county jail. Just a bit of reading for the prisoners. The titles included: "A Book of Escapes" by John Buchan, Canada's governor-general designate, and "Bars of Iron," by Ethel M. Dell.

Returning To Japan

Charming Native Of Korea Spends Three Years Attending Canadian Schools

Sada Navise, charming native of Korea, is returning to Japan after spending three years in Canada attending Canadian colleges. She plans to take back to her native land methods of western education.

She taught school in Korea, later going to Japan, where she worked with Dr. F. G. Price, evangelist. On his advice she left for Canada, spending two years at Alma college, St. Thomas, Ont., before studying at a training school. She plans to be a religious educationist in Tokyo.

In a Japanese kimono she loves to wear, she is an accomplished musician.

Miss Navise is visiting in Edmonton as the guest of Miss Dorothy McElin, with whom she attended United Church Missionary Training College in Toronto last year.

She said no English translation could do justice to Japanese poetry, which was written in two measures, one containing 31 beats, metrically divided, and the other only 17. Children in their earliest lessons were taught verse, and she wrote her first poem at the age of five.

Japanese women were invading every field—even the police force, and were popular officers, she said.

Making Use Of 'Planes

More Than Hundred Kept Busy By Russian Industries

Industry in Soviet Russia is keeping 110 airplanes busy. They serve factories, construction jobs, oil fields and mines, transporting square parts and carrying experts in emergencies. Planes are widely used by the oil trusts in geological prospecting and by the power industry to determine points where high-tension overhead lines have been damaged.

Fall In Driving Tests

A greater number of women than men motorists have failed to pass the new official driving tests in Great Britain. A special report showing the percentage of the women "ploughed" by the Ministry of Transport examiners since the tests began has just been made public.

TEN TIMES HIGHER THAN NIAGARA

Della Falls on Vancouver Island, reached by road and trail from Victoria. These falls are 1,580 feet high or exactly ten times higher than Niagara and nearly four times higher than the famous falls on the Victoria-Nyanza on the Zambesi in Africa. They are in the heart of Vancouver Island and are reached from Victoria by motor road 138 miles and then 10 miles trail. They are the highest falls on this continent and the second or third highest falls in the world.

Italy's Wheat-Mixing Law

Has Cut Down Imports Of Grain From Canada

Imports of Canadian wheat into Italy are restricted, not only by relatively high custom duties—over six dollars per 100 kilos—but also by the application of the wheat-mixing law. The latter, as at present effective, compels Italian millers to grind 99 per cent. of both hard and soft Italian wheat, thus leaving only one per cent. foreign wheat in the finished product. In spite of these difficulties, Canada exported 24,512 metric tons of hard, 15,523 metric tons of soft wheat, and 15,594 quintals (220 pounds per quintal) of wheat flour to Italy in 1934.

No Test Needed

American paper money will fold five thousand times by actual test, without cracking or breaking. There is no need for any such test in Canada, where it is impossible to hold on to paper money for more than one folding says the Ottawa Citizen.

Restrictions For Newboys

Vendors In Feping, China, Forbidden To Shout Headlines

Deeming that the loud cries of newboys tended to spread alarm and uneasiness in that already nervous city, the Feping authorities have issued an order whereby all new-vendors are prohibited from shouting the headlines of their papers, but must limit themselves to merely saying the names of their publications.

Another reason for the new ruling is that the newboys advertise in a particularly loud voice the racy and vulgar stories that appear even to the last detail, in the less reputable papers.

Bread Made From Seaweed

Seaweed bread now has a modest sale along the Pacific slope. It's made from giant kelp plants that grow in profusion along the coast and contain iodine and other mineral considered beneficial. And while the bread has an odd flavor, its far from unpalatable.

Household Arts

PATTERN 5123

Now is the time to stock up on such things as bedspreads. And how effectively you can do this with this lovely basket design. It's made in the simplest stitches and grows quickly under your needle. Do it in the color that will harmonize with your bedroom whether it's dainty or bold in coloring. If you wish scarfs and other lines to go with it, you will find matching motifs in Pattern 5123 which appeared some time ago.

In pattern 5123 you will find a transfer pattern of a basket 15½ x 19 inches, a bolster motif 7 x 18 inches, and four corner motifs 4½ x 5½ inches; material requirements; color suggestions, and illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

AUGUST 4

JOSIAH (A Religious Reformer)

Golden text: Thou shalt worship the Lord thy God, and him only shalt thou serve. Matthew 4:10.

Lesson: II. Kings 22:1 to 23:30.
Devotional reading: Deuteronomy 6:4-13.

Explanations And Comments

The Covenant Made by King Josiah and His People, II. Kings 23:1-3. After the finding of the Book of the law, told about in the chapter preceding our lesson, Josiah, the King of Judah, called a representative assembly to Jerusalem, elders and men of Judah, priests and prophets (Jeremiah, Habakkuk and Zephaniah were living about this time) and the people "both small and great," young and old. After having them listen to the reading aloud of the book, he stood on the platform and covenanted before Jehovah to keep with all his heart, God's commandments and testimonies and statutes "his orders and his warnings and his rules" (Moffatt's translation) which they had just heard read, and then he called upon all the assembly "to stand to it," to signify by a rising vote their purpose of keeping the law. "All the people confirmed the compact" (Moffatt's translation).

Josiah's Religious Reforms, II. Kings 23:4-20. Very thorough was Josiah in his reform measures. He had the temple purged of every idol and every vessel that had been used for idolatrous worship, removed the idolatrous priests, and destroyed all the idolatrous altars and altars of Judah. Not content with this, he had the same thorough work done in the Northern Kingdom, even digging up bones of the priests of Baal and burning them upon the altars of Baal, and having living high priests of Baal slain.

The Passover Kept, II. Kings 23:21-23. Second Chronicles 35:1-8 gives greater details about the keeping of this Passover. So notable was the keeping of the Passover in its strict following of the directions laid down in the Book of the Law and in the numbers taking part, that the writer of the account declares it far exceeded any observed during the days of the judges or in the reigns of any of the kings either of Israel or of Judah. "Formerly the Passover had been a household feast which could be observed anywhere throughout the country (Dt. 16:5); now for the first time the people were obliged to come up to Jerusalem for the purpose of celebrating it."

Recipes For This Week

(By Betty Barclay)

PECAN CHOCOLATE MOUSSE

2 squares unsweetened chocolate
¼ cups cold milk
¼ egg yolks, slightly beaten
1 package strawberry-flavored gelatin
¼ teaspoon salt
¼ teaspoon vanilla
½ cup pecan meats, coarsely cut
¼ cup cream, whipped

Add chocolate to milk and heat in double boiler. When chocolate is melted, beat with rotary egg beater until mixture is smooth and blended. Combine sugar and egg yolks; add small amount of chocolate mixture, stirring vigorously; return to double boiler and cook until thickened, stirring constantly. Add gelatin and salt and stir over hot water until gelatin is dissolved. When slightly thickened, add vanilla and fold in nuts and cream. Turn into individual molds. Chill until firm. Unmold. Serves eight.

BLACKBERRY JAM

4 cups (2 lbs.) prepared fruit
7 cups (3 lbs.) sugar
½ bottle fruit pectin

To prepare fruit, grind about two quarts fully ripe berries or crush completely one layer at a time so that each berry is reduced to a pulp. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 3 minutes. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes and cool slightly to prevent foaming fruit. Four quickly. Paraffin hot jam at once. Makes about 10 glasses (6 fluid ounces each).

There are no new plans left in the world to discover, lamented an explorer. We had been wondering why it was so hard to find a fresh spot for a picnic.

Little Journeys In Science

ACIDS

(By Gordon H. Guest, M.A.)

Acids are important compounds with which when dissolved in water possess a sour taste. They also have the property of turning blue litmus, a dye extracted from certain lichens, red. A substance such, as litmus, which undergoes a change in color upon the addition of an acid or alkali, is known in science as an indicator. Thus litmus is red in the presence of an acid and blue in the presence of an alkali.

The most common acids are sulphuric, hydrochloric, nitric, carbonic, and acetic. Acetic acid is the active part of vinegar, which has been used by man for thousands of years. Apples, lemons, grapefruit and other fruits owe their agreeable flavor, in part, to acids, such as malic, citric, and tartaric. Acids always contain the element hydrogen and often oxygen.

Hydrochloric acid gas may be prepared by pouring strong sulphuric acid upon salt. It is a very soluble gas and the solution is known as hydrochloric acid. This acid is used for the preparation of hydrogen and chlorine and for cleansing the surface of metals.

Concentrated sulphuric acid, or oil of vitriol, contains about 5 per cent. of water. When the strong acid is poured into water, an enormous quantity of heat is generated. Concentrated sulphuric acid has a great affinity for water, or for the elements which make up water, namely hydrogen and oxygen. Cane-sugar, for instance, when mixed with concentrated sulphuric acid is poured into a syringe of sugar, the sugar turns black and froths violently, because the hydrogen and oxygen are driven from the sugar to form water, leaving black carbon. Nearly all chemical industries use sulphuric acid and hence vast quantities of it are manufactured.

Nitric acid when pure is a colorless liquid. The concentrated acid contains about 68 per cent. of the active substance and 32 per cent. of water. When this acid is mixed with hydrochloric acid a mixture known as aqua regia is produced. Aqua regia is the Latin for royal water and was given that name because it dissolves the noble metal gold. Nitric acid is used in the manufacture of explosives and fertilizers.

Carbonic acid is produced by bubbling carbon dioxide gas into water. It is found in nature, although it is a weak acid, which decomposes very readily, it plays an important role in certain processes which take place in nature. Thus, it dissolves limestone, and gradually dissolves carbonate rocks to form caves.

Earth May Blow Up

Surrounding Shell Being Gradually Melted By Internal Heat

Old Dr. Bailey-Willis, 78, of Palo Alto, who loves to scare the wits out of "seismophobes" Southern Californians, presented a picture of Earth's structure and future, and said that in quieted many a long-range imagination. The Earth, Dr. Willis suggested, originally was an aggregation of cold substances which gravitation pulled into a tight little planetary mass somewhere between 50 million and 100 million years ago. Ever since, radioactive elements in Earth's material have been driving energy towards its centre until to-day the core of Earth is a hot fluid mass of iron, nickel, radium and other heavy elements 4,000 miles in diameter surrounded by a rocky shell 2,000 miles thick. As cona pass, "the persistent release of atomic forces continue, and will continue to supply heat and melt the surrounding shell with the result that Mother Earth may eventually take her place among the stars."

Seeking a logical reason for the frequency of earthquakes along the shores of the Pacific, Dr. Beno Gutenberg of Pasadena presented a thesis that the Pacific Ocean represents a vast area over which Earth has lost 20 miles of outside skin. That "raw spot" in Mother Earth's side promises to explain the true nature of Earth's disturbances, the crustal movements appearing to extend along the edges of the skinless areas. We should never be so quick to predict the day on which an earthquake will occur. But it is possible that we shall be able to set the date to within a year or so. "From Time.

Women pipers, it has been decided, are not eligible for membership of the London Scottish Pipe Band, a body composed of bagpipe players and la-

WOULD SUGGEST A FIXED PRICE FOR WHEAT CROP

Saskatoon.—Wheat was the major subject under discussion at a session of the provincial conference of Co-operative Trading Associations. Forecast of a demand for special legislation from the provincial government, and a resolution fixing \$1.06 as the least price the farmer should receive for this year's crop were highlights of the meeting.

The legislation which will be asked, A. F. Sproule, director of the pool from La Fleche, intimated will call for farmers to receive regular grain storage charges of one per cent. per bushel per month for wheat held by them in their farm granaries. Elevator companies received this amount, and farmers should be placed upon the same basis, he believed.

He intimated that legislation would also be sought to allow the farmer to hold for his own use enough grain to cover necessary living and operating expenses and to give him an opportunity to build up his herds of livestock.

Mr. Sproule declared that if farmers had not been compelled to sacrifice their hogs and all his cattle except the few required for home use, 70 to 80 millions of bushels of the present wheat surplus would have been consumed on the farms where they were grown.

The resolution calling for a minimum price of \$1.06 a bushel for the present crop was introduced by George Dickerton, president of the U.F.C. A similar resolution had been adopted by his organization. The co-operators favored the resolution by a small majority.

In addition to the discussion of wheat, the conference adopted two resolutions dealing with the advancement of education in co-operation. The first resolution was "that the executive of this conference and the executive of the co-operative society be requested to make arrangements with the University of Saskatchewan for a winter short course of instruction on the subject of co-operation."

The other called for lectures on co-operation to be given in connection with all farm boys' camps arranged by agricultural societies and the extension department of the university.

W. B. Francis led the discussion on education for co-operation. Mr. Sproule, Wheat Pool director, declared that the objectives of this group had been and still were to make close contacts with the consumers abroad and he believed this could be obtained only through a policy of orderly marketing.

Chosen For Olympics

Member Of C.N. Police At Winnipeg Going To Rome

Montreal.—Constable R. G. Pickrell, of the Canadian National Railways police force in Winnipeg, has been chosen to represent Canada and the British Empire in the Olympic shooting matches to be held in Rome in September. It was announced in a cable received here from London.

Pickrell suffered a serious wrist injury at Blaisy and was unable to compete in the second week's shooting, the cable said. Despite his handicap, however, he lost the Blaisy pistol championship by only one point.

Last month he captured the annual Scottish pistol match at St. Andrews, Scotland, with 97 out of a possible 100.

Would Honor Jacques Cartier

Quebec.—A mass demonstration was held on Dufferin Heights by the National Jacques Cartier Society, sponsors of a project to have July 24, anniversary of the discovery of Canada by Jacques Cartier, declared a national holiday.

Separate Treaty

Tokyo.—Japan is willing to make a separate naval treaty with Great Britain as Germany did, and believes it might be arranged, a naval office spokesman intimated in an interview with Havas.

Issue Of Peace And War

League Of Nations Must Act On Ethiopian Question

London.—Britain and France at last have agreed the special council meeting of the League of Nations must get down to business on the issue of peace or war between Italy and Ethiopia.

The issue affects the political independence of a state that is a member of the league. Neither in conversations with British representatives nor in official despatches has Mussolini yet definitely formulated the nature of his demands on Ethiopia. But from semi-official declarations it is taken for granted that he wants political control over either part or the whole of Ethiopia.

Under article 12 of the covenant, it is agreed, Italy is bound to agree to reference of the dispute to the league. The British hold the council should go ahead with the merits of the dispute whether Italy objects or not, and that the council should not seek by some technicality to divest itself of responsibility.

This was stressed by Sir Samuel Hoare, foreign secretary, when he informed the House of Commons the forthcoming league council session should take definite action in the dispute, adding: "The question of actions to be taken in any such event is a matter to be determined in the light of the particular circumstances such as the provisions of the covenant, and I do not consider a declaration in general unspecified terms would serve any useful purpose." He told questioners, however, "His Majesty's government will always be ready to co-operate with the United States government in seeking to preserve peace."

Higher Duty On Jap Goods

Canada Has Increased Tax On Imports From Orient

Ottawa.—Canada has hit back at Japan's edict imposing a 50 cent surtax on Canadian goods going into the Oriental kingdom. Effective on and after Aug. 5, all imports entering the country from Japan will pay a duty of 33½ per cent. ad valorem, addition to duties now levied.

The effective date in the case of each country conforms: so that goods now in transit either to or from Japan are exempt from the imposts the two nations have slapped on. Intimation was the next move in the trade situation was up to Japan.

There is a difference between the two surtaxes. Japan applies her extra impost to 10 imports from this country including lumber, pulp and paper; that excludes what she needs, such as nickel, lead and zinc. Canada's surtax applies to all imports from the Oriental kingdom.

Will Represent Canada

Nova Scotia Teacher Attending Educational Meet In England

Wolfeville, N.S.—Miss Rosamond deWolfe Archibald, of Wolfeville, has left for England to act as Canada's representative on the international relations committee at the Congress of Education which convenes at Oxford, August 10 to 17.

An authority on English, Miss Archibald has been asked to deliver an address outlining her own methods of teaching at Horton Academy here. She also has been called upon to confer in the matter of inaugurating a world-wide essay contest for Goodwill Day in 1936.

Miss Archibald represented Canada last fall at the annual convention of the National Council of Teachers of English at Washington.

Ghandi Is Through

Calgary.—Mahatma Ghandi is definitely through as a political agitator, C. Jinaradas, Theosophical Society lecturer from Madras, India, said. "Ghandi has petered out," he added. "He is politically out of commission and the mischief he has done rousing antagonisms between peoples is finished."

May Not Be True

Ottawa.—Penitentiary officials here had no knowledge of the alleged withholding of letters from Norman "Red" Ryan during his incarceration in Kingston penitentiary. 2109

RETURNS

Here is a picture of the Rev. Charles W. Gordon of Winnipeg, better known as Ralph Connor, as he returned to Canada on the "Niagara" from a visit to the Antipodes.

Expense Survey

Would Investigate The Whole Field Of Governmental Expenditures

Saint John, N.B.—Appointment of a royal commission to survey the whole field of governmental expenditures "for the purpose of indicating where and how such expenditures might be curtailed," was urged here by A. O. Dawson, Montreal, president of the Canadian Chamber of Commerce, as he spoke at a luncheon sponsored by the Saint John Board of Trade.

"Effectiveness of the drive for economy is illustrated in the fact that a large number of municipalities, especially in western Canada, have actually put their budgets in balance, that the controllable expenditures of the Dominion were reduced some \$1 million dollars during the past three years, 1931-1934 and that there has been a net decrease in provincial expenditures of some 74 million dollars during 1933-34, compared with a net increase of some 29 million dollars during the preceding year," Mr. Dawson said.

Veteran Printer Dead

Montreal.—Isaac Glennon, 79, one of the veteran printers of Montreal, well known here and in western Canada, died suddenly last week. He went to western Canada 25 years ago and was resident at the Pas, Man., until his return to this city.

Wants Action

Says Something Should Be Done To Alleviate Flood Conditions In North

Edmonton.—Unless something is done immediately to alleviate the northern flood situation, he will lead a march of northern people on Edmonton to demand action by the government, L. A. Groulx, Liberal candidate for Groulx, said.

"People are demanding action, and not telegrams or communications and discussions with Ottawa," said Mr. Groulx.

The sand bank at the mouth of Lesser Slave Lake should be dredged and the 11 crooked bends at the mouth of the Lesser Slave river straightened out, said Mr. Groulx. This was a small undertaking, engineers having estimated in 1930 that the river course could be straightened for \$9,000.

Guests At Exhibition

Saskatoon Entertained Riel Veterans And Indians For Day

Saskatoon.—Representatives of both sides of the last great historic struggle between the white and the red men, with western Canada as the prize, stood side by side on the grandstand platform at Saskatoon's Industrial Exhibition to be officially welcomed and introduced by Mayor Pinder to the large assemblage in attendance.

It was just a half century ago that these veterans of the rebellion of '85 went to battle on Saskatchewan soil. The mere handful of the old guard now left were the guests of the exhibition management for the entire day. The event took the form of a reunion, some coming from Regina, Brandon and other points in the west, including Victoria, B.C.

Author Ran Into Difficulty

Found Ride Over Alps On Elephant Required Cash

Rome.—Richard Halliburton, American traveller and author who is trying to emulate Hannibal in "conquering Italy" by crossing the Alps on an elephant, struck a snag when Italian authorities at the frontier point of Gran Sasso Bernardo told him he would have to pay a deposit of 50 per cent. of the elephant's value.

Halliburton was forced to return to Lucerne, Switzerland, minus the elephant, to obtain funds for the customs deposit—something Hannibal did not have to worry about. Halliburton returned with the money, but he still had another modern obstacle to overcome in his journey to Rome—a veterinarian must pass on the elephant's sanitary qualifications before it enters Italy.

THE KING REVIEWS HIS AIR FORCE

This picture shows His Majesty the King wearing, for the first time, the uniform of an air marshal as he reviews the Guard of Honour at Mildenhall where he inspected the greatest gathering of British fighting planes in the history of aviation. More than 300 types of aircraft took part in the great jubilee review and later flew past Their Majesties at Duxford.

STATES STAND OF B.C. IN RESPECT TO TRADE MATTERS

Victoria.—British Columbia should "demand" a new national policy from the Dominion, or adequate compensation for its present position in respect to internal and external trade, the provincial government was advised in a report of The Economic Council, released by Premier T. D. Pattullo.

The report, prepared by Dr. W. A. Carrothers, chairman, and the council's research department, states:

"British Columbia buys the major portion of the manufactured commodities which it consumes from eastern Canadian factories in protected markets and sells the major portion of its own products in open competition in the markets of the world."

"British Columbia is dependent upon the revenue arising from its exports to pay for the imports from eastern Canada. If the prices of the commodities which British Columbia sells to rest fall below prices which she has to buy, this places British Columbia in an unfavorable trading position."

"Mainly because of tariff protection, eastern manufacturers have been able to realize falling prices while producers in British Columbia, mainly producing primary products, are exposed to the full competition of similar producers in all parts of the world and consequently are not in a position to realize falling prices."

"This disadvantageous position of British Columbia has been a large factor in increasing the burden of debt, public, business and private, of the people of this province."

"This study clearly shows British Columbia has a logical claim for redress."

"This claim may take two forms: To demand that a national policy be adopted which would place the producers of British Columbia in a comparable position with the manufacturers of eastern Canada as far as the marketing of their products is concerned; and, if it is not considered to be in the national interest to modify the national policy in this respect, then adequate compensation should be made to the people of British Columbia."

Floods In China

Red Cross Has Picked Up 20,000 Bodies Of Victims Drowned

Shanghai.—The Hankow Red Cross Society announced it had picked up 30,000 bodies of persons drowned in the present floods along the Han and Yangtze rivers near Hankow alone and reports from other points indicated a far greater loss of life.

While central China turned to the task of counting its dead, piling up by the tens of thousands along the banks of rivers from which flood waters were receding, the northern provinces continued to battle the floods of the Yellow river.

The latter, crashing barrier after barrier to swallow immense new areas of fertile farmlands, has already blanketed more than 10,000 square miles of the Shantung countryside. Governor Pan Fu Chu of Shantung sent an urgent telegram to Nanking reporting nearly 8,000,000 of his people homeless.

The neighboring provinces of Hopei, Honan and Shensi are also seriously hit. Government authorities and relief agencies said the Yangtze's devastation of the five provinces affected is so immense that it still is impossible to estimate the total losses.

More On Voters' List

Ottawa.—Voters' lists for the federal election will be completed August 15, it was announced by Col. John Thompson, Dominion franchise commissioner. Following the recent revision, they are being printed at the government bureau at the rate of 10 ridings daily. The lists will show 6,000,000 men and women eligible to vote, an increase of 250,000 over the basic lists last year.

The malaria epidemic in Cayton took 74,000 lives, from November to the end of April.

WHAT IS WEALTH?

Nearly all of these rosy schemes for abolishing Poverty day after tomorrow come from a false idea of wealth, says a writer in an Eastern magazine.

The most common error is that wealth is money. But in reality money merely serves as a counter for wealth: and sometimes it only pretends to do that. Thus it is absurd to think wealth can be created by printing money.

As has been aptly said, money made out of nothing will be worth nothing. It may fool people at first, but they soon wake up. Worse yet, fiat money tends to destroy existing values, thereby actually diminishing wealth.

Our corporate wealth consists to a large extent of substantial, demonstrable values. But seize our business concerns to divide them up, and what have you? You cannot distribute a factory, a mine, a hotel, a railroad, a store. You could distribute the stocks and bonds, but under an irresponsible dictator they would turn worthless.

NEW SCHEDULE FOR PUBLIC SCHOOLS.

A revised course for Grades 1 to 8 is being prepared for Alberta schools. The objectives are to introduce such material as will be of practical value and use to the pupils; therefore much that overloads the present course will be left out.

The method of teaching will also be a decided change. Much project (or enterprise) work—as it will be called—will be undertaken, with the teacher superintending, while the project is developed by pupil activities.

Thus from the child's own experience and achievement he gets knowledge with development of mind, which is real education, as he is gradually trained to work and think for himself.

This is the basis of the principle on which the new revision is being made, though many details are yet to be worked out, such as grouping of grades—primary grades 1, 2, 3, intermediate 4, 5, 6, for projects.

The new curriculum will not be introduced into the schools generally until September of 1936.

In the meantime, it is to be tried as an experiment this coming year in 3 schools of each inspectorate in Alberta. The teachers of these schools by invitation of the Dept. of Education are attending the Summer School, studying this course, in preparation, and to be able to make the required reports of their findings from time to time to the committee in charge.

STONY PLAIN SUN.

THE NEWS OF STONY PLAIN AND DISTRICT.

Dr and Mrs R. M. Oatway left Friday night on a rail trip to Halifax, with a stopover at Carleton Place, Ont., at which place they have been invited to attend the wedding of a relative.

Mr. R. C. Johnson, Conservative candidate in S.P. Constituency, was a business visitor in town on Saturday Eve.

The five-family picnic to the Beach on Sunday did not have very good weather for the occasion, but they succeeded in having a good time.

Mr. and Mrs. Jacob Gebhart and family, former residents, arrived here Monday by motor car from Los Angeles, California. They were accompanied by Mr. Thies Sr., another old resident.

The Captain Gosset motor party arrived back Monday from a trip to Banff and other resorts.

The electrical storm at Saturday played havoc with one of the wires which supplies light and power to part of the town, leaving the patrons for several hours without these services.

The Sunday trips on the Midland Bus Line have ceased for this season.

On Saturday 2 carloads of harvesting machinery arrived for Louie Wudel, IHC agent. BUTTER AND EGGS WANTED at The Royal Cafe.

MacLeod Not Quitting.

Absolutely denied that he would retire from the Provincial election campaign now under way and not seek reelection was given Monday by Donald MacLeod. Mr. MacLeod declared that the report, current in his riding over the weekend, was without foundation.

F. Brown Commits Suicide.

With a warrant out for his arrest on a charge of theft, the body of F. W. Brown, an Edmonton resident for many years, was found Tuesday in the waters of Edmonton beach by a RUMP search party. Police believe Brown committed suicide.

For Sale at Hardwick's

Sparkie Sez:

A young man often stays up nights to learn things which cause an old man insomnia because of his inability to forget them.

Then there is the sweet young thing who went out golfing, and when she was asked what she went around in said: "Not much these days."

Crows Are Old Soaks.

Alberta's scheme of filling eggs with whisky to make crows tipsy has been a failure, a recent conference at Battleford, Sask., of Saskatchewan Fish & Game League was told. The crows, a delegate reported, devoured the eggs without ill effects, and seemingly looked for more.

And Sun Bonnet for the Horse

One of the Calgary girls got a job clerking in a country store and as she was somewhat fresh and very green to country life, some of the store's customers had a lot of fun at her expense, says a writer in High River Times.

However, she got back at one of them who, when he was in for the Saturday night shopping, got shoes for the kids, stockings for the misers and other things, and then suddenly remembered, and said:

"O, yes; gimme some shorts for the pigs."
This was one time he didn't get it over, though, for the Calgary girl was not going to be hooked again, so she drawled:

"O, Yeah? And how about some brassieres for the cows?"

Agriculture In School

An almost perennial subject of discussion is the school curriculum, what it should and what it should not contain. Many there are who think that the present-day curriculum in most countries is over-loaded with subjects and contain much that should not be there. There are others, including numerous organizations, who are constantly demanding that this or that new subject be added. For example, there are those who strongly advocate the teaching of temperance, not so much in the wider meaning of that term, but in direct relation to the use of intoxicants. Others insist that religion should be taught, while others again object even to recitation of the Lord's Prayer or the Ten Commandments. Still others call for the teaching of co-operation, the meaning and use of money, while the number of so-called social subjects and problems which different groups insist should be included in the curriculum are almost beyond calculation.

The real difficulty seems to lie in the opposing views held as to what is education, and what is the function of the school in providing it to the youth of the land. Is it the main function of the school to impart information, or is it to so develop and train the mind and intellectual powers of the student as to equip him or her for the battle of life irrespective of the sphere in which they may live or the particular activity in which they may be engaged? If the former, then a very extensive curriculum would be necessary to cater to all classes of students; if the latter, a fairly short and condensed curriculum might serve all.

There is one subject, however, apart from the rudimentary subjects such as reading, writing, arithmetic, geography, history, composition, etc., which it has been generally recognized should, to the full extent possible, be included in our school courses, and especially so in the western provinces of Canada, and that is, agriculture. Addressing the recent annual convention of the Canadian Society of Technical Agriculturists assembled at Edmonton, Dr. R. C. Wallace, president of the University of Alberta, discussed this particular aspect of present-day education in the schools. Having stated that a good deal of thought has been given in past years to the kind of education in agriculture which can best be introduced into the school curriculum, Dr. Wallace said that it had to be frankly admitted that relatively little success had attended the efforts of those who are concerned with school education in the teaching of agriculture; that the formal agriculture of Grade IX and X, of the high school has the whole lot not achieved what was expected of it; and that the school garden, so enthusiastically proclaimed thirty or four years ago, cannot be seen in Western Canada to-day.

While stating that it would necessitate going too far afield to discuss all the underlying difficulties—lack of trained teachers, discontinuity of school life during the growing season, etc.—Dr. Wallace said it had been learned that in public and high school it was science and not the art of a vocation that could be taught successfully. For that reason he was honestly of opinion that successful work in agriculture in the public and high school will come incidentally to the study of natural science. If the applications of the principles of science were continuously made in plant and animal processes, in weather here, and in soil processes, interest in agriculture and in agricultural procedure would grow naturally out of the underlying scientific principles which have universal application; and the teacher would not be placed in the compromising position of posing, unsuccessfully, as an expert in a field where he or she was not accepted. That would be, he felt, the emphasis of the future.

On the other hand, Dr. Wallace pointed out, there had been real success in boys' and girls' club work, and in school fairs in which agricultural projects had played their part, mainly because the activities were extra-curricular and conducted in the realistic atmosphere of the farm with the help of trained district agriculturists. In so far as these projects were honestly carried out by the young people themselves, they were the soundest accomplishment which had yet been achieved in the vocational activity in agriculture of school-age boys and girls. The unfortunate fact was that this system, as yet, did not reach all schools and school children in the rural districts.

These observations by Dr. Wallace would seem to merit the serious consideration, not alone of Provincial departments of education and agriculture, but of the parents of farm boys and girls who are themselves the trustees of rural schools and directors of agricultural societies. Dr. Wallace places stress on those scientific truths which are fundamental, which must be recognized and obeyed if success is to be achieved. There can be learned in school through the natural science course, even though such course may not be distinctly labelled agriculture. Successful agriculture cannot be learned wholly from a book, or through a study course, any more than can carpentering or any other vocation. But if pupils are sent out from the schools well grounded in fundamentals, made acquainted with the immutability of Nature's laws, with instincts trained to observation, to the detection of the true from the false, imbued with initiative and ambition, they will be primarily equipped for a career in agriculture or in any profession they may choose.

Lives Life In The Arctic

Quebec Girl Spends Two Years In the North, And Is Going Back Again

Cities have no attraction for Marie Ormset, 20-year-old Gaspé girl. She found city life "empty" when she visited Montreal after two years at Cameron Bay, a mining settlement on Great Bear Lake, near the Arctic circle.

Marie spent a few days with her sister at Montreal, then left for her home in Gaspé. Late in the summer she expects to marry a young mining engineer, a graduate of Queen's, now in the Athabasca district, and return to the north to live.

In the summer of 1933 Marie, then 18 and fresh from the sheltered life of a convent, set out from Gaspé for Cameron Bay, to visit her brother whom she had not seen for eight years. Travelling by rail to Peace River she joined a party taking in supplies. They began a hazardous journey by boat through the Peace river, Lake Athabasca, Slave river, Great Slave lake and the Mackenzie and Great Bear rivers.

When the party reached Fort Franklin, 250 miles from their destination, Sept. 1, the water was freezing fast, and there was no hope of navigating Great Bear Lake that season. A plane was chartered to complete the trip, and Marie had her first experience of flying.

Trips by airplane to visit silver and pitchblende mines in the vicinity were among her first experiences. It was some time, however, before she was permitted to go down into the mines. The miners were superstitious about women in the workings.

At Cameron Bay, where Marie was one of eight white women, she had plenty of time to observe the life and customs of the Indians and Eskimos. She preferred the latter, she said, because they were cleaner in their habits than the Indians.

Wives among the Eskimos may be barred just as are articles of commerce. Marie told of one occasion when an Eskimo offered his wife and two daughters in exchange for a fine rifle which he coveted. Stealing another man's wife, however, is a serious crime, for justice, in the Eskimo idea of justice, death is the fit punishment.

Gulls Fond Of Cherries

Have Their Own Method Of Securing The Fruit

A remarkable case of birds meeting a new situation by a change in their characteristic behavior has just been reported to the U.S. Biological Survey. The birds are the gulls at Salt Lake Valley of Utah. They are fond of cherries. Great cherry orchards have sprung up through the territory in the last few decades.

Now the gull with its clumsy, webbed feet, cannot perch on the branches and help itself to cherries like the robin. It must wait for the fruit to fall which doesn't happen in the great commercial orchards. So the gulls have learned to hover over the trees, beat down the fruit with their wings and then fly to the ground and feast on their harvest. They also have been observed in the tops of the cherry trees supporting themselves with outspread wings and devouring all the fruit within reach.

The new food habit says Clarence Cottam, food-habits expert of the Biological Survey, seems to have developed as a result of a locally increased gull population and the consequent greater competition for the limited supply of usual foods.

Cheered 'Wrong' Man

Lloyd George, has a "double" in James Gray, a magistrate in Glasgow, Scotland. This former premier learned when he recently appeared before an audience of 3,000 in Glasgow to tell about his New Deal proposals. Gray arrived at the hall first, was mistaken for Lloyd George, and received round and round of cheers. When Lloyd George arrived much of the lung power had been spent.

FASHION FANCIES

303
SUCH CHILDLIKE CHIC — EASY TO WEAR—SO SIMPLE TO MAKE AND AT MODERATE COST

By Ellen Worth
Here's a darling little coat and hat ensemble for tiny tots, so easy to wear—and smart.

The coat buttons snugly at the neck, and being double breasted, affords ample chest protection. In soft Copenhagen diagonal worsted is this model with hat to match. It was lined with a wool silk crepe mixture.

For more severe weather, a lovely idea is to use a quilted effect woolly backed silk. This is warmer than an ordinary lining and does away with the necessity of using an interlining. Style No. 303 is designed for sizes 1, 2, 3 and 4 years. Size 4 requires 1 1/2 yards of 54-inch material for hat and coat with 1 1/2 yards of 35-inch lining and 1/2 yard of 12-inch interlining for hat. Pattern includes the hat and coat.

Pattern 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Looking For Foot

Hendrick Willem Van Loon, noted Dutch-American historian and traveler, who recently commenced a radio program from New York, as a boy of 11 in Rotterdam spent three days watching a statue of Erasmus to see if the bronze figure really did turn a page of his book every hour, as the legend said.

Suitor—And where is your sister, Jimmy?

Jimmy—She just ran upstairs to change rings when she saw you coming. 2109

Health Of The World

Population Of Most Countries Retains Good Health During Years Of Depression

According to the data supplied by the League of Nations Year Book, it looks as though mankind not only could take the depression, but waxes healthy under its vicissitudes. The death rate in all except three of the thirty countries reporting was less than the average in the prosperous five years 1920 to 1930. The birth rate average also fell, rising slightly in the last year in five of the countries, namely, Germany, Great Britain, Ireland, Poland and Denmark.

Germany has a long lead in this regard, her population increasing 7.1 per 1,000, twice as fast as in 1933, and seven times faster than that of France, and more than twice as fast as that of Great Britain, where it was 3.3 last year. United States for 1933 was 5.7.

The League book does not touch upon the cases of mental illness, but a study made by the United States National Committee for Mental Disease and the American Psychiatric Association, asserts that mental ailments have shown no increase since the depression, a finding that is contrary to the general impression—Winnipeg Free Press.

Dutch Submarine Travels From Holland To West Indies

The most ambitious trip ever undertaken in any submarine ended recently when The Netherlands Navy's K-18 arrived at Amsterdam from Surabaya, East Indies, having left Helder, Holland, on November 14 last, covering a distance of more than 25,000 miles.

The submarine, under her own power and without an escort, visited five continents. The trip included fifteen, twenty and twenty-five day stretches without a break. The submarine dived 230 times, remaining under water for 26 hours. The crew of 35 men was under Commander G. E. Hertzsky, also aboard being Professor Felix A. Vening, of Utrecht University, charged with scientific observations. The latter made the deepest sounding ever made in the Atlantic, namely 6,700 metres between Dakar and Pernambuco.

Agriculture In School

An almost perennial subject of discussion is the school curriculum, what it should and what it should not contain. Many there are who contend that the present-day curriculum in most countries is over-loaded with subjects and contain much that should not be there. There are others, including numerous organizations, who are constantly demanding that this or that new subject be added. For example, there are those who strongly advocate the teaching of temperance, not so much in the wider meaning of that term, but in direct relation to the use of intoxicants. Others insist that religion should be taught, while others again object even to recitation of the Lord's Prayer or the Ten Commandments. Still others call for the teaching of co-operation, the meaning and use of money, while the number of so-called social subjects and problems which different groups insist should be included in the curriculum are almost beyond calculation.

The real difficulty seems to lie in the opposing views held as to what is education, and what is the function of the school in providing it to the youth of the land. Is it the main function of the school to impart information, or is it to so develop and train the mind and intellectual powers of the student as to equip him or her for the battle of life irrespective of the sphere in which they may live or the particular activity in which they may be engaged? If the former, then a very extensive curriculum would be necessary to cater to all classes of students; if the latter, a fairly short and condensed curriculum might serve all.

There is one subject, however, apart from the rudimentary subjects such as reading, writing, arithmetic, geography, history, composition, etc., which it has been generally recognized should, to the full extent possible, be included in our school courses, and especially so in the western provinces of Canada, and that is, agriculture. Addressing the recent annual convention of the Canadian Society of Technical Agriculture assembled at Edmonton, Dr. R. C. Wallace, president of the University of Alberta, discussed this particular aspect of present-day curricula in the schools. Having stated that a good deal of thought has been given in past years to the kind of education in agriculture which can best be introduced into the school curriculum, Dr. Wallace said that it had to be frankly admitted that relatively little success had attended the efforts of those who are concerned with school education in the teaching of agriculture; that the formal agriculture of Grade IX and X of the high school had on the whole not achieved what was expected of it; and that the school garden, so enthusiastically proclaimed thirty years ago, cannot be seen in Western Canada to-day.

While stating that it would necessitate going too far afield to discuss all the underlying difficulties—lack of trained teachers, discontinuity of school life during the growing season, etc.—Dr. Wallace said it had been learned that in public and high school it was science and not the art of a vocation that could be taught successfully. For that reason, he was of opinion that successful work in agriculture in the public and high school will come incidentally to the study of natural science. If the applications of the principles of science were continuously made in plant and animal processes, in weather lore, and in soil processes, interest in agriculture and in agricultural procedures would grow naturally out of the underlying scientific principles which have universal application; and the teacher would not be placed in the compromising position of posing, unwillingly, as an expert in a field where he or she was not accepted. That would be, he felt, the emphasis of the future.

On the other hand, Dr. Wallace pointed out, there had been real success in boys' and girls' club work, and in school fairs in which agricultural projects had played their part, mainly because the activities were extra-curricular and conducted in the realistic atmosphere of the farm with the help of trained district agriculturists. In so far as these projects were honestly carried out by the young people themselves, they were the soundest accomplishment which had yet been achieved in the vocational activity in agriculture of school-age boys and girls. The unfortunate fact was that this system, as yet, did not reach all schools and school children in the rural districts.

These observations by Dr. Wallace would seem to merit the serious consideration, not alone of Provincial departments of education and agriculture, but of the parents of farm boys and girls who are themselves the trustees of rural schools and directors of agricultural societies. Dr. Wallace places stress on those scientific truths which are fundamental, which must be recognized and obeyed if success is to be achieved. These can be learned in school through the natural science course, even though such course may not be distinctly labelled agriculture. Successful agriculture cannot be learned wholly from a book, or through a study course, any more than can carpentering or any other vocation. But if pupils are sent out from the schools well grounded in fundamentals, made acquainted with the immutability of Nature's laws, with the intelligence trained to observation, to the detection of the true from the false, imbued with initiative and ambition, they will be primarily equipped for a career in agriculture or in any profession they may choose.

Likes Life In The Arctic

Quebec Girl Spends Two Years In the North, And Is Going Back Again

Cities have no attraction for Marie Ornat, 20-year-old Gaspe girl. She found city life "empty" when she visited Montreal after two years at Cameron Bay, a mining settlement on Great Bear Lake, near the Arctic circle.

Marie spent a few days with her sister at Montreal, then left for her home in Gaspe. Late in the summer she expects to marry a young mining engineer, a graduate of Queen's, now in the Athabasca district, and return to the north to live.

In the summer of 1933 Marie, then 15 and fresh from the sheltered life of a convent, set out from Gaspe for Cameron Bay to visit her brother whom she had not seen for eight years. Travelling by rail to Peace River she joined a party taking in supplies. Then began a hazardous journey by boat through the Peace river, Lake Athabasca, Slave river, Great Slave lake and the Mackenzie and Great Bear rivers.

When the party reached Fort Franklin, 250 miles from their destination, Sept. 1, the water was freezing fast, and there was no hope of navigating Great Bear Lake that season. A plane was chartered to complete the trip, and Marie had her first experience of flying.

Trips by airplane to visit silver and pitchblende mines in the vicinity were among her later experiences. It was some time, however, before she was permitted to go down into the mines. The miners were superstitious about women in the workings.

At Cameron Bay, where Marie was one of eight white women, she had plenty of time to observe the life and customs of the Indians and Eskimos. She preferred the latter, she said, because they were cleaner in their habits than the Indians.

Wives among the Eskimos may be bartered, just as are articles of commerce. Marie told of one occasion when an Eskimo offered his wife and two daughters in exchange for a fine rifle which he coveted. Stealing another man's wife, however, is a serious crime, for which, in the Eskimo idea of justice, death is the punishment.

Gulls Fond Of Cherries

Have Their Own Method Of Securing The Fruit

A remarkable case of birds meeting a new situation by a change in their characteristic behavior has just been reported to the U.S. Biological Survey. The birds are the gulls at Salt Lake Valley of Utah. They are fond of cherries. Great cherry orchards have sprung up through the territory in the last few decades.

Now the gull with its clumsy, webbed feet, cannot perch on the branches and help itself to cherries like the robin. It must wait for the fruit to fall which doesn't happen in the great commercial orchards. So the gulls have learned to hover over the trees, beat down the fruit with their wings and then fly to the ground and feast on their harvest. They also have been observed in the tops of the cherry trees supporting themselves with outspread wings and devouring all the fruit within reach.

The new food habit says Clarence Cottam, food-habits expert of the Biological Survey, seems to have developed as a result of a locally increased gull population and the consequent greater competition for the limited supply of usual foods.

Cheered Wrong Man

Lloyd George, has a "double" in James Gray, a magistrate in Glasgow, Scotland. This the former premier learned when he recently appeared before an audience of 3,000 in Glasgow to tell about his New Deal proposals. Gray arrived at the hall first, was mistaken for Lloyd George, and received round and round of cheers. When Lloyd George arrived much of the lung power had been spent.

FASHION FANCIES

SUCH CHILDLIKE CHIC—EASY TO WEAR—SO SIMPLE TO MAKE AND AT MODERATE COST

By Ellen Worth
Here's a darling little coat and hat ensemble for tiny tots, so easy to wear—and smart.

The coat buttons snugly at the neck, and being double breasted, affords ample chest protection. In soft open-bell diagonal worsted was this model with hat to match. It was lined with a wool silk crepe mixture.

For more severe weather, a lovely idea is to use a quilted effect woolly backed silk. This is warmer than an ordinary lining and does away with the necessity of using an interlining. Style No. 303 is designed for sizes 1, 2, 3 and 4 years. Size 4 requires 1 1/2 yards of 54-inch material for hat and coat with 1 1/2 yards of 25-inch lining and 3/4 yard of 12-inch interlining for hat. Pattern includes the hat and coat.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg. Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day the price is 15 cents.

Looking For Loon

Hendrick Willem Van Loon, noted Dutch-American historian and traveler, who recently commenced a radio program from New York, as a boy of 11 in Rotterdam spent three days watching a statue of Erasmus to see if the bronze figure really did turn a page of his book every hour, as the legend said.

Suitor—And where is your sister, Jimmy?

Jimmy—She just ran upstairs to change rings when she saw you coming. 2109

Health Of The World

Population Of Most Countries Retains Good Health During Years Of Depression

According to the data supplied by the League of Nations Year Book, it looks as though mankind not only could take the depression, but waxes healthy under its vicissitudes. The death rate in all except three of the thirty countries reporting was less than the average in the prosperous five years 1926 to 1930. The birth rate average also fell, rising slightly in the last year in five of the countries, namely, Germany, Great Britain, Ireland, Poland and Denmark.

Germany has a long lead in this regard, her population increasing 7.1 per 1,000, twice as fast as in 1933, and seven times faster than that of France, and more than twice as fast as that of Great Britain, where it was 3.3 last year. United States for 1933 was 5.7.

The League book does not touch upon the cases of mental illness, but a study made by the United States National Committee for Mental Disease and the American Psychiatric Association, asserts that mental ailments have shown no increase since the depression, a finding that is contrary to the general impression—Winnipeg Free Press.

LINIMENT

WHAT IS WEALTH?

Nearly all of these rosy schemes for abolishing Poverty day after tomorrow come from a false idea of wealth, says a writer in an Eastern magazine.

The most common error is that wealth is money. But in reality money merely serves as a counter for wealth: and sometimes it only pretends to do that. Thus it is absurd to think wealth can be created by printing money.

As has been aptly said, money made out of nothing will be worth nothing. It may fool people at first, but they soon wake up. Worse yet, fiat money tends to destroy existing values, thereby actually diminishing wealth.

Our corporate wealth consists to a large extent of substantial, demonstrable values. But seize our business concerns to divide them up, and what have you? You cannot distribute a factory, a mine, a hotel, a railroad, a store. You could distribute the stocks and bonds, but under an irresponsible dictator they would turn worthless.

NEW SCHEDULE FOR PUBLIC SCHOOLS.

A revised course for Grades 1 to 8 is being prepared for Alberta schools. The objectives are to introduce such material as will be of practical value and use to the pupils; therefore much that overloads the present course will be left out.

The method of teaching will also be a decided change. Much project (or enterprise) work—as it will be called—will be undertaken, with the teacher superintending, while the project is developed by pupil activities.

Thus from the child's own experience and achievement he gets knowledge with development of mind, which is real education, as he is gradually trained to work and think for himself.

This is the basis of the principle on which the new revision is being made, though many details are yet to be worked out, such as grouping of grades—primary grades 1, 2, 3, intermediate 4, 5, 6, for projects.

The new curriculum will not be introduced into the schools generally until September of 1936.

In the meantime, it is to be tried as an experiment this coming year in 3 schools of each inspectorate in Alberta. The teachers of these schools by invitation of the Dept. of Education are attending the Summer School, studying this course, in preparation, and to be able to make the required reports of their findings from time to time to the committee in charge.

THE NEWS OF STONY PLAIN AND DISTRICT.

Dr and Mrs R M Outway left Friday night on a rail trip to Halifax, with a stopover at Carleton Place, Ont., at which place they have been invited to attend the wedding of a relative.

Mr R C Johnson, Conservative candidate in S.P. Constituency, was a business visitor in town on Saturday Eve.

The five-family picnic to the Beach on Sunday did not have very good weather for the occasion, but they succeeded in having a good time.

Mr and Mrs Jacob Gebhart and family, former residents, arrived here Monday by motor car from Los Angeles, California. They were accompanied by Mr Thies Sr., another old resident.

The Captain Gosset motor party arrived back Monday from a trip to Banff and other resorts.

The electrical storm at Saturday played havoc with one of the wires which supplies light and power to part of the town, leaving the patrons for several hours without these services.

The Sunday trips on the Midland Bus Line have ceased for this season.

On Saturday 2 carloads of harvesting machinery arrived for Louie Wudel, IHC agent. BUTTER AND EGGS WANTED at The Royal Cafe.

MacLeod Not Quitting.

Absolutedenial that he would retire from the Provincial election campaign now under way and not seek re-election was given Monday by Donald MacLeod: Mr MacLeod declared that the report, current in his riding over the weekend, was without foundation.

F. Brown Commits Suicide.

With a warrant out for his arrest on a charge of theft, the body of F W Brown, an Edmonton resident for many years, was found Tuesday in the waters of Edmonton beach by a RCMP search party. Police believe Brown committed suicide.

For Sale at Hardwick's

Sparkie Sez:

A young man often stays up nights to learn things which cause an old man insomnia because of his inability to forget them.

Then there is the sweet young thing who went out golfing, and when she was asked what she went around in said: "Not much these days."

Crows Are Old Soaks.

Alberta's scheme of filling eggs with whisky to make crows tipsy has been a failure, a recent conference at Battleford, Sask., of Saskatchewan Fish & Game League was told. The crows, a delegate reported, disavowed the eggs without ill effects, and seemingly looked for more.

And Sun Bonnet for the Horse

One of the Calgary girls got a job clerking in a country store and as she was somewhat fresh and very green to country life, some of the store's customers had a lot of fun at her expense, says a writer in High River Times.

However, she got back at one of them who, when he was in for the Saturday night shopping, got shoes for the kids, stockings for the misers and other things, and then suddenly remembered, and said:

"O, yes, gimme some shorts for the pigs."

This was one time he didn't get it over, though, for the Calgary girl was not going to be hooked again, so she drew it.

"O, Yeah? And how about some brassieres for the cows?"

Do You Want the Levy?

On August 22d the electors of Alberta will be asked to decide whether they want the levy. Mr. Aberhart has now made it abundantly clear that any dividends that may be given must be collected back by means of a levy.

A levy is a tax. No quibbling can get away from this fact. The Oxford Dictionary, the greatest authority on the English language, defines a levy as "a tax", and Mr. Aberhart himself in his evidence before the Alberta House (page 23) stated definitely that dividends must be collected back by taxation.

Who will pay the levy? In his Manual (page 39) Mr Aberhart states that the levy on a bushel of wheat will be a direct levy on the consumer. Will that not also be true in the case of a levy on a binder, a plow, or a suit of clothes? Thus, as in all such taxes, the consumer pays—not the Big Shot, who will still receive his invoice price see Manual, page 35). The farmer is the largest consumer of goods in Alberta.

Do you want the levy? or do you want real Monetary Reform in the Dominion field, as advocated by the Liberal Party? Next week we will explain what we mean by Monetary Reform. The Liberals now control eight of the nine provinces, and will control the Dominion. Let us have united action from coast to coast.

Note Liberal!

SPORTING NOTES OF LOCAL INTEREST

At Brightbank picnic the Brightbank ball team won over Hansen's by 12 runs to 2. Stony's girl basketballers won 1st prize at the hoops. Mr M. Barnes won 1st place in the 100-yd. dash, and has filed his application for the prize.

The local ball team and a gang of admirers have arranged to go to Onoway today, to take part in the sporting events.

The Rifle Club's marksmen returned Friday from the Calgary shooting contests, having won their quota of cash prizes, but no trophies, cups, or medals.

It begins to look as tho there won't be any finals in the Softball League.

In the Morning Only.

Mr Bryan wishes us to state that, from now until the date of the Provincial election on August 22d he will be in his office only until noon of each day.

Completed Fifteen Years.

With this issue The Sun commences the sixteenth year of its publication in Stony Plain. The Publisher takes this opportunity of thanking The Sun's many friends, advertisers, subscribers and job patrons, for making its continued publication possible.

Rust in Western Canada.

The officials of the Dominion Rust Research Laboratory, Winnipeg, state that the sports of black stem rust have been discovered on the wheat plant in most of Manitoba south of Russell, and in Saskatchewan east of Regina, south of Yorkton. They state the infection appears to be still spreading west and north of the points mentioned.

Our Research Department has calculated that the area now affected contains approximately 3,500,000 acres seeded to Red Spring wheat—1,400,000 in Manitoba; 2,100,000 in Saskatchewan.

An average crop on this particular acreage would be between 55 and 60 million bushels of wheat. The amount of this bushelage that will be lost to rust infection will apparently depend upon the weather occurring between the present time and harvest.—Searle Grain Company's Bulletin.

On the Side.

Quite a to-do was raised for several months by politicians because the date of the Provincial election was not disclosed. Those who raised heck over such a condition, Mr Duggan's instance, apparently have cooled off, as no forward move is noticeable, for the advancing of the interests of the Conservative candidates in this constituency R. G. Johnson.

Liberal Candidate Bryan is now in the midst of a very energetic campaign, holding meetings nightly; his recent meetings being in the west end of the Constituency.

Social Credit Candidate Hayes is also waging a lusty campaign, and is receiving great encouragement in every district where he has given addresses.

—The electors in some of the constituencies are having things mixed up for them. Down in Macleod the Tories and UFAs have joined forces, to oppose the Liberal and Social Credit candidates.

—In Sturgeon Constituency 5 (only) candidates are in the field—Social Credit, Liberal, Conservative, UFA, Communist. J. Russell Leve, UFA candidate, will find things a bit more exciting there than he did in Wainwright, the constituency he represented in the last three Legislatures.

—"Funny how politicians like to talk over the radio; they can't say, the next morning, when they want to take something back, that they were misquoted by the reporter," remarks a contemporary. But it's a well known fact that all politicians don't listen the same, particularly when they listen to a political broadcast.

—Another three weeks and Albertans will know the color of their next Government, says the Edmonton Journal. Or will they? Maybe the second and the third choices will not all have been counted by then.
